

University of Pune
Faculty of Physical Education
Ph.D. (Physical Education)
Revised – PhD Course Work 2013

(A) Preamble

The Ph.D. Program shall consist of a combination of Course work (Part A)and Research work (Part B). Ph. D. (Physical Education) scholars are required to complete the course work consisting of 20 credits at the Research Centre. The details of Course work (Part A) is as follows

Course I Research Methodology
Course II Optional Course I and II
Course III Field work, Seminar, Practical work and academic activities

Only those candidates who have completed M.Phil. from any Statutory University and whose admission at M.Phil. was done through an Entrance Examination and Course work was prescribed at M.Phil. level, such candidates will be exempted from the Course work.

(B) Frame work of Course work for Ph.D. in Physical Education

Course	Title	Credits	Weightage factor
1	Research Methodology	5	80
2	Optional Course 1 Optional course 2	5 5	160
3	Field-work, seminar, Practical work & academic activities	5	80
	Total	20	320 (marks)

Course I Research Methodology (5 credits)

This Course would provide an in-depth knowledge of Research processes in Physical Education. It would include quantitative, qualitative methods of Research and data analysis, use of information and communication technology in Research wherever applicable. Emphasis should be given to the specific Research method in which the scholar is working.

The department/research centre will make the syllabi available to the scholars. It will arrange for common sessions by experts and guidance sessions. The scholars may attend guidance sessions for research methodology organized by sister departments/ institutes within the University.

Course II Optional Course (10 credits)

This course consists of 2 optional courses each of 5 credits, which will be scholar's research area specific. The purpose of these courses is to broaden the scholars' understanding of the subject in which he is conducting his research. These courses would be conducted on the basis of guided reading supervised by the guide. Optional course 1 deals with the theoretical basis of the concerned research area while optional course 2 deals with the review of research in the specific area and its relevance and implications in the present time.

Course III Field work, Seminar, Practical work and academic activities

This Course consists of conducting and presenting pilot study and a joint research publication by the scholar and guide, at a National/International Conference or a publication in an ISSN Journal (Copy to be submitted)

(C)Evaluation

The evaluation procedure will be decided by the Concerned department/Research Centre.

The activities to be completed for the evaluation of each course are given below.

Course I – Research Methodology

Details	Credits
1. Review I Research paper from refereed Journal 2. Review a book on Research Methodology	1
3. Preparation of Research Problem	2
4. Presentation of Research Problem	1
5. Written Test	1
Total	5

Course II - Optional Course I

Details	Credits
1. Concept Note (Compulsory)	2
2. Presentation of Concept note (Compulsory)	1
3. Any 2 from a, b & C a. Book Review (concerned area) b. Content Analysis c. Need Assessment Survey	2
Total	5

Course II - Optional Course II

Details	Credits
Review of Literature (Subject specific)	2
Presentation of the above	1
Preparation of references and bibliography	1
Evaluation of Thesis/ Dissertation (Assignment)	1
Total	5

Course III Field work, Seminar, Practical work and academic activities

Details	Credits
Pilot Survey and Presentation	3
1 Joint Research publication by candidate and guide on research topic	2
Total	5

The evaluation for each student should be completed within six months from the date of registration for the coursework. The centre should issue certificate of completion to the candidate.
